

REMARKS

On May 19, 2005, a Notice of Allowance and a Notice of Allowability were mailed in the above-identified application allowing claims 26 – 42. The Notice of Allowability included an Examiner's Amendment in which claims 26, 30, 31, 33, 34, 35, 38 and 42 were amended. This Amendment is being submitted to "correct" certain amendments made claims 26 and 33 in the Examiner's Amendment.

Claim 26 was amended in the Examiner's Amendment to add certain language at the end of line 18 to claim 26 which recited, among other things, a "movable beam". Claim 26 has now been amended to change "movable beam" to -- first beam -- , since "movable beam" is not previously recited in claim 26.

Claim 33 has been amended to recite -- doped silicon dioxide -- , since, without the addition of the words "silicon dioxide", the claim, as amended in the Examiner's Amendment, would not make sense.

On September 17, 2003, a Preliminary Amendment was filed in the present application to amend its specification to add at the beginning of the specification the present application's claims for domestic priority. In particular, the amendment to the specification requested by the September 17, 2003 Preliminary Amendment stated: "This application is a divisional of Application Serial No. 10/147,300, filed May 17, 2002, and claims the benefit of Provisional Application No. 60/291,423, filed May 18, 2001" (Emphasis added).

On December 11, 2003, a Filing Receipt was issued for the present application which acknowledged that the present application is a divisional of the '300 application, but which failed to acknowledge the present application's claim to the benefit of the '423 provisional application. This omission in the Filing Receipt was realized in a recent final review of the file for the present application in connection with the issuance of a Notice of Allowance in the present application on May 19, 2005.

The present Amendment After Allowance amends the paragraph at the beginning of the present application's specification to state: stated: "This application is a divisional of Application Serial No. 10/147,300, filed May 17, 2002, which claims the benefit of Provisional Application No. 60/291,423, filed May 18, 2001" so that the present application's claim to the benefit of the '423 provisional application is recognized by the USPTO and reflected on the patent issuing from this application.

Submitted with this Amendment After Allowance is a Request for a Corrected Filing Receipt to request acknowledgement by the USPTO of the claim in the present application to the benefit of the '423 provisional application.

It is respectfully requested that the amendment to the paragraph at the beginning of the present application's specification be entered and the Request for a Corrected Filing

OZGUR

Serial No.: 10/663,983

Receipt be granted so that a Corrected Filing Receipt is issued acknowledging the claim in the present application to the benefit of the '423 provisional application.

Respectfully submitted,

NIXON & VANDERHYE P.C.
